

THE AIRFREIGHT.COM CAPACITY

Each ground vehicle in AirFreight.com's extensive network is carefully vetted before use, ensuring each one meets specific standards and regulations. Each truck and van can securely transport cargo of all weights and sizes on cross-country shipments within the United States, Canada, and Mexico as well as local and regional destinations.

When it comes to fast truck deliveries, AirFreight.com's experienced expeditors streamline the expedited freight process by matching the cargo's size and weight with the best vehicle. We also offer exclusive vehicle use, which gives you full access to the vehicle selected.

AIRFREIGHT.COM OFFERS:

Single point of contact: Work with the same expeditor during your shipment's entire journey—no annoying call centers!

Shipment-to-vehicle matching system: We carefully match the size and weight of your shipment to the right vehicle.

Vetted and experienced exclusive use carriers: We only work with approved carriers who are vetted to carry various types of shipments. This means your freight is picked up, loaded, and delivered using one vehicle through the entire delivery process.

Real-time monitoring and alerts: Our GPS tracking technology lets us know exactly where your shipment is at all times.

SPRINTER VAN

BOX TRUCK / CUBE VAN / SMALL STRAIGHT TRUCK

STRAIGHT TRUCK

53' DRY VAN

FULL FLAT BED

Whether you require the use of our 53-foot tractor-trailer, a full flat-bed trailer or a 12-foot Sprinter Van for your expedited freight, AirFreight.com's ground truck delivery services have the capacity to accommodate shipments of virtually any size and weight. Working with vetted and approved experienced carriers, an advanced shipment-to-vehicle matching system, real-time tracking, and exclusive use vehicles are just a few of the advantages we offer our clients.
